

CyberIntel Threat Advisory - automated analysis of source reporting: affected systems, actor attribution, and recommended actions.

INTELLIGENCE SNAPSHOT

Issued by	CyberIntel
Date	15 June 2026
Source	bleepingcomputer
Threat Level	UNKNOWN
Affected Systems / Vendors	-
Threat Actors	-
CVEs	None identified
Reference	https://www.bleepingcomputer.com/news/security/page/7/
Classification	For Authorised Recipients

Executive Summary

We need to produce JSON with fields: summary, cves, threat_actors, severity, affected_systems, recommended_actions. We must extract every relevant detail from article. Must be thorough, not terse. Provide summary 5-7 sentences. Provide cves list of every CVE mentioned. Let's scan article for CVE identifiers. Article mentions: - "critical zero-day vulnerability in a server running the KnowledgeDeliver learning management system (LMS) to deploy the Godzilla web shell." No CVE given. - "critical vulnerability in the LiteSpeed cPanel user-end plugin" – no CVE. - "SQL injection vulnerability in the Drupal content management system (CMS)" – no CVE but later "SQL injection vulnerability (CVE-2026-26980) in Ghost CMS". So CVE-2026-26980. - "critical SQL injection vulnerability announced earl

■ THREAT LEVEL: UNKNOWN
